## WORSHIP AREAS

## THREE AREAS, ONE WHOLE

*Three hexagons share edges and meet at a single point, the shared Table. Each area keeps its own tradition, while gold doors in the shared walls link them.*

**Why hexagons?**

Hexagons fit together with no gaps, so three areas become one building. Their six sides can recall the six days of creation (Genesis 1), and the shape is strong, like a honeycomb, so the building will last for generations.
